

North Star Support Bot – Project Submission

Project Overview

This submission contains a functional customer support chatbot built using Botpress for a simulated outdoor apparel and camping gear e-commerce business.

Features Implemented

- Order Tracking: Supports order #111, #222, #333 and invalid orders.
- Returns & Exchanges: 30-day returns, unused items, original packaging required.
- Shipping Information: Standard (3–5 business days), Expedited (1–2 business days).
- Product Recommendations: Asks clarifying questions and recommends suitable product categories.
- Human Handoff: Simulates transfer to a live agent and allows return to the main menu.
- Intent Recognition: Handles multiple user phrasings for supported requests.
- Fallback Handling: Provides a clear fallback response and guidance.

Testing

The chatbot uses only the provided mock data. No API keys, subscriptions, or additional setup are required for evaluation.

Deliverables Included

- Botpress chatbot implementation
- 2–3 minute demo video covering all required use cases and one fallback scenario.

Thank you for reviewing my submission.
